

Network Camera-V5.7.20 Release Note-E8 (2022-12-12)

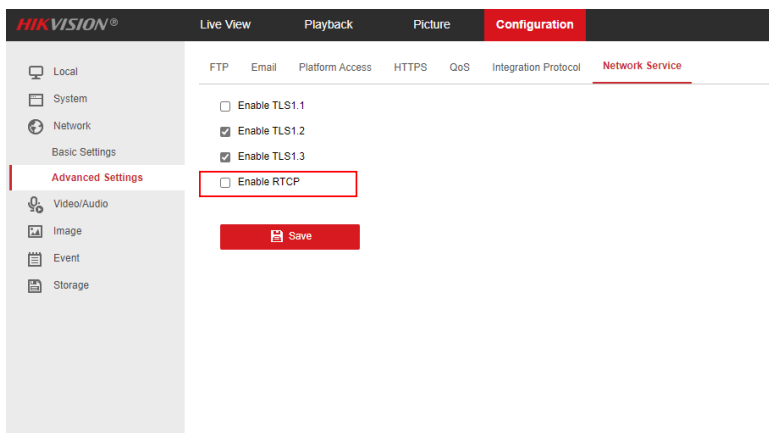

Firmware Basic Information

Firmware version:

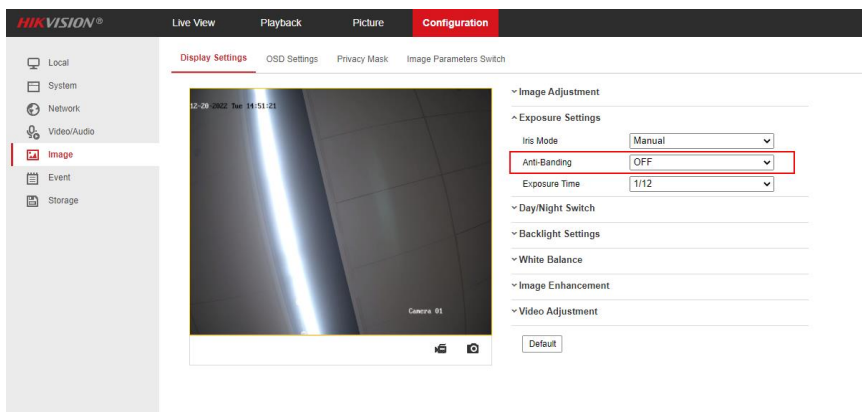

V5.7.20 build221212

New Features

1. Add "Enable RTCP", the default off.

2. Support anti-banding, the default off. The fastest exposure time limited to 1/100 when the status is on.

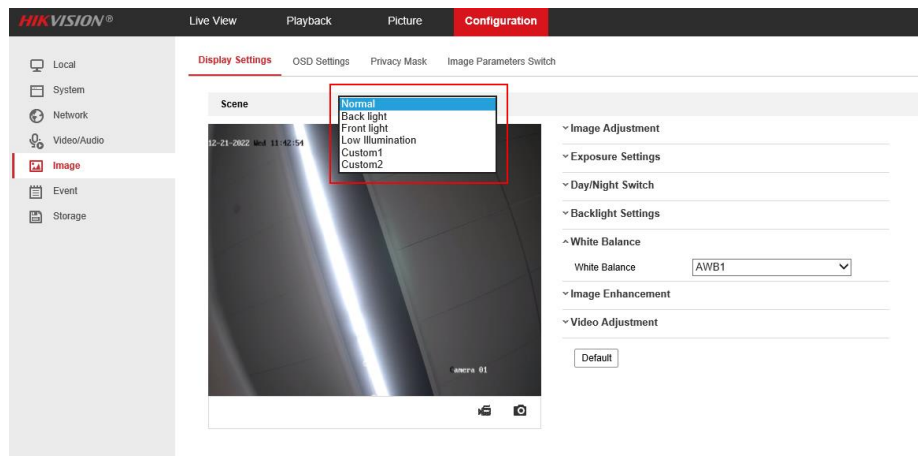

3. 1 series WiFi products support NPQ (open by NVR when accessing wifi NVR) and cascade (2 level cascade).

4. 4G dual SIM single standby models support configuration of external SIM card priority, enabled by default.

Modify Function

1. Support 6 sets of image scenes and timed scene switching.

2. Repair WiFi cascade stability problems.

3. Support for associating the latest ODM tools to run Onvif reports. Onvif adds security and time check.

4. Fix the problem of LiveView lagging access to HC.

5. Solve the problem of OSD immobility after 3 consecutive OSD configurations within 3 seconds.

Customer Impact and Recommended Action

This update refers to function/compatibility improvement and will take effect automatically after the Date of Change. We are very sorry for any inconvenience of use-habit changes caused by this action.

For any questions and request for this firmware, please contact our local technical support team.

Remarks:

- Hikvision reserves the right to change, alter or withdraw the above notification without prior notice.
- Product design and specifications are subject to change without prior notice.
- The Hikvision firmware may contain errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

- Hikvision is not liable for any typing or printing errors.
