

Network Camera Firmware Version: V5.8.1 Release Note

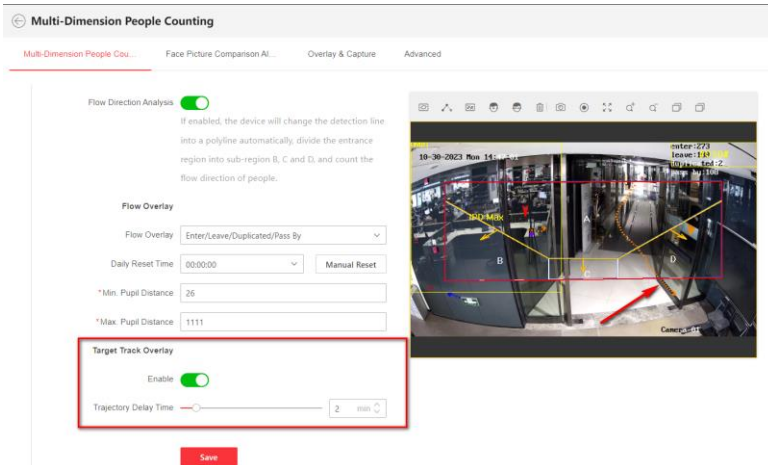

Firmware Basic Information	Firmware Version:	V5.8.1 build 231017
---------------------------------------	-------------------	---------------------

1. New Features

- When the flow direction analysis function is enabled, support overlay pass by data on OSD.

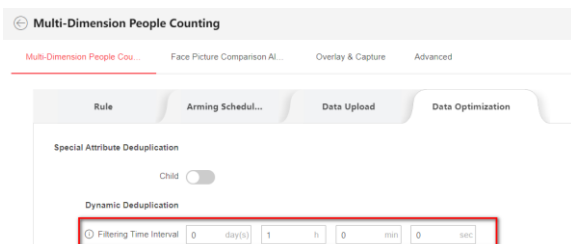

- Newly support target track overly function.

2. Modify Features

- Dynamic Deduplication → Filtering Time Interval support in days, minutes, and seconds. Range from 0 day 0 hour 0 min 0 sec to 6 days 23 hours 59 min 59 sec.

- Support enable Face Exposure and configure face exposure parameters.

The screenshot displays the configuration interface for 'Multi-Dimension People Counting'. The 'Advanced' tab is selected, showing various settings. A red box highlights the 'Face Exposure' section, which includes a toggle switch for 'Face Exposure' (turned on), a 'Reference Brightness' slider set to 50, a 'Min. Duration' slider set to 10 min, and a 'Face Filtering Time' slider set to 0 sec. Below this section, there is an 'Overlay Intelligent Information' toggle (turned off) and a 'Data Management' section with a 'Clear Storage Data' button. A red 'Save' button is located at the bottom of the configuration area.

Customer Impact and Recommended Action

This update refers to function/compatibility improvement and will take effect automatically after the Date of Change. We are very sorry for any inconvenience of use-habit changes caused by this action. For any questions and request for this firmware, please contact our local technical support team.

Remarks:

- Hikvision reserves the right to change, alter or withdraw the above notification without prior notice.
- Product design and specifications are subject to change without prior notice.
- The Hikvision firmware may contain errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.
- Hikvision is not liable for any typing or printing errors.
